Autodesk's AutoCAD is widely used in architecture, engineering, construction, manufacturing, and related fields. AutoCAD users can design, draft, and edit 2D drawings and 3D models for printing and viewing on a computer screen. They can also print 2D drawings on paper and electronically transmit them. They can annotate and modify the models. Some models can be used as an interactive blueprint, enabling users to interactively drill, cut, bend, and move the model in 3D space. AutoCAD also includes tools for creating 2D and 3D models of imported and modeled objects, importing and editing 2D drawings and 2D image data, importing images and creating text-based 2D illustrations, creating new drawing and editing functions, and exporting 2D and 3D files in common file formats. AutoCAD can also create 2D and 3D annotations that can be linked to the model. AutoCAD can be installed on a personal computer (PC) or workstation, or can be used remotely. However, it requires a network connection and connectivity to a 3D graphics card to be installed on a computer. The most common version of AutoCAD is available for the PC and Mac. AutoCAD is also available as a mobile app, a web app, and a cloud-based service. AutoCAD 2017 introduces AutoCAD 365, a subscription-based cloud-based service that enables users to collaborate on drawings and models in the cloud. Autodesk is selling a perpetual license for AutoCAD 2019 as well. Who is this guide for? This AutoCAD Beginner's Guide will help you: Get started using AutoCAD. I would like to be able to find all the timestamps of a given action and return the last time the user performed that action. For example: SELECT * FROM actions WHERE user_id = 2 AND action = 'jogging' Which should return the following results: +----+----------+---------------------+ | id | user_id | timestamp | +----+----------+---------------------+ | 4 | 2 | 2014-05-16 05:48:43 | | 5 | 2 | 2014-05-16 04:46:47 | | 6 | 2 | 2014-05-16 04:43:53 | | 7 | 2 | 2014-05-16 04:40:44 | | 8 | 2 | 2014-05-16 04:30:35 | | 9 | 2 | 2014-05-16 04:17:22 | +----+----------+---------------------+ Is this possible using standard SQL? I would ideally like to do this without using a correlated subquery to select the 'last' timestamp, as this is getting more complicated than I anticipated. A: You could use something like this. In your example, this would return rows 4-8: SELECT * ca3bfb1094

Q: Numpy default filling with zero I am trying to implement the following function in Python: df.ix[df.index.isin(list(df.index[:N])),:] = 0 I tried the following code in Python: df.ix[np.isin(df.index, list(df.index[:N])),:] = 0 But this code raises ValueError: The truth value of an array with more than one element is ambiguous. Use a.any() or a.all() Can anyone help me with that? A: You can use iloc instead: import numpy as np df.iloc[np.isin(df.index, list(df.index[:N])),:] = 0 Note that iloc is a bit faster than ix, but less intuitive. –156. D. Dale and P.
