Category:Paizo Publishing game productsQ: In Civ 5, should I spend money on shipping to ship soldiers In the civ games I've played, there are 2 strategies: Pay for each soldier you buy to ship home, or spend a lot of money on civic buildings (like research and cities) to keep your supply lines strong. Which approach is better? A: It's really about what you want to achieve. (and how much of each resource you have) The issue is that if you are going to send troops to another civ with the goal of conquering them, then you are going to have to expend some resources that you would not have to expend if you were going to keep them at home instead of sending them overseas. That's the trade-off. One approach is to spend more money, and have your units stay home; the other is to spend less money, sending your units overseas. One advantage of spending less money is that you may be able to send a large military unit and leave many of your cities in place, which gives your cities bonus points for growth and might even help you occupy an area if you capture an objective. This could be useful for gaining more information about your opponent's land as well. On the other hand, it c9d1549cdd

If you are looking for the return of the classic AOE flavor of turn-based strategy or enjoy a broader variety of tile-based strategy games with MMORPG elements, then Age of Fear 3, despite its many issues (like really poor manual) is a good game to get into. Gameplay: Age of Fear 3 is a grand strategy with lots of units and abilities. It plays like a combination of Age of War 2 and Age of Mythology, which is not a bad combination at all and I'm happy that Age of Fear 3 kept the good stuff from its older siblings. The game mechanics are quite simple, but understandable. To determine game events, dice rolls are used as they were in many of the other games. They are simple and a fun addition to the game. The battles themselves are fun, there are multiple methods of victory which make each battle different. The basic AOE mechanics are all there; attacking enemies, trading, cult summoning. The abilities are a bit "bread and butter" for turn-based strategy games, but I have no idea what else to add. The campaigns are real mix of fun; city building, PvP, etc. It's a shame the manual is so bad, but the developers are looking into its availability, which is a plus. It's a shame that the manual is so bad. It could have been better. There's a lot of work in the game's development. The manual itself is one of the most outdated I have ever seen. I was actually surprised how much the game was pushed out the door. It's awesome how the mod community has helped it improve. Better audio and music would also be nice. The newer Age of Fear games had it right. Other than graphics, Age of Fear 3 has a few problems. Campaigns: There is a campaign, which is what it looks like: a bunch of opposing factions and you have to pick which side you go with. The campaigns aren't that long, but the choices of factions are too narrow. In theory you can pick any faction, but that's not really the case. For example, you can't actually pick any faction in the game. Instead, you have to pick what faction you're going to compete against. I ended up picking the most popular faction and got the most popular faction. Anyone else? Anyway, in theory you can pick a faction you like, but that's not really the case. You have to pick a faction you
