Multiplayer: You can directly connect with other players and cooperate with them for common causes. The process is similar to the "common cause" option of online games. In addition, players in a group will be able to invite other players to their party. In the event that a player leaves the group, the party leader will be able to invite another player to replace the player. You can freely invite up to 4 players to your party. As a special feature of clans, players can connect with people from a certain place, share the same fight. Slide Control - Control a character with the left analog stick or a third-person view camera. Attack Slides: You can attack when holding the right analog stick. When the faction of your choice is chosen as the opponent faction, you are assigned as a "mediator" character and the opposing faction becomes your "faction." The faction, which you select at the beginning of the game, can change between episodes. While playing, you can set up your list of quests and view the story gradually as time goes on. When the number of episodes that have been finished exceeds the episode capacity, you will be able to play the next episode in the following game. CONQUER AND BECOME RULERS OF THE LAND • Explore and Battle In addition to the large and diverse world, you can freely explore. In-depth maps give a three-dimensional atmosphere, and you can easily access underground dungeons. You can enjoy battles with many
