Conquerors of the Lost Continent

Talk about epic! C.o.I.C. is a real-time strategy game that will challenge your strategy and skill to the edge! Fight epic battles with one of 26 characters as you lead your troops to victory! Snag up treasure, capture resources, and level-up to empower your team!

Molento King took over an island composed of lush forests and beautiful landscapes. In many ways, it was a city built by God. It seems as if no one was living in it before he was born! Residing in this city is an enemy known as Scavenger. If you hear it talking about a huge treasure, it is indeed your mission to discover it! After acquiring the loot you have searched for, you will find yourself on the ocean. You will find it!

While it was a city of silence when Molento King took possession of it, it has now grown into an enormous country! It boasts a large landmass and a fairly modern society. Even though they have no relation to the war that is raging in the surrounding areas, they will ally with you in times of need. They will never harm you and they may even join you when it comes to the next battle. This wealthy kingdom has gone through many catastrophes in the past. Thanks to you, it is now a land where prosperity is returning!

It wasn't long before this land became the talk of the continent! It can no longer be called an island so it has been up for countless battles and countless wars! One day, an item was discovered in the forest that can be changed into a weapon using "transformation!" The new weapon

Game Page: About the Game: Hello and welcome to I Can Gun, a shooter about scavenging for ammunition and ammo drops for your weapon in procedurally generated levels. You start out with 1 bullet in your weapon and will scavenge for more as you go, double and triple feeding is possible. The difficulty will increase over time as the number of bullets needed to win the level goes down. Think you're good at shooting game? Try to beat the high score as you try to get rid of your weapon in as little time as possible to get to 0. Game "I Can Gun" Screenshots: Mouse+Keyboard Gameplay: VR Gameplay: Instructions: [Mouse + Keyboard] Controls: Fire -- Hold down the shift key. Move -- Move with WASD. Note you can remap the keys. Toggle Weapons -- Press CTRL+1, CTRL+2, CTRL+3. [VR] Controls: Fire -- Hold down the right trigger. Move -- Move with WASD. Note you can remap the keys. Toggle Weapons -- Press the buttons on your VR controller (use the thumbsticks if you have them). More to come! Also check out the Demo Version at: Note: The game does not have any sort of offline play. If you want to practice a bit, I recommend you use the alternate version of the game, more details here: The game will also be ported to most mobile devices as well as PC and Mac at a later date. My goal is to eventually port the game to VR, but I don't have an Oculus Rift at the moment. If you love the game please leave a review in the App Store as this will help me a lot. If you think the game is bad then please let me know! I want to get some suggestions and fix issues so that the game improves over time! But thanks for your opinion and feedback :) Do you think that the current civilization is very simple? It doesn't need to be

What's new in Hero Siege - Cyberpunk Samurai (Class Skin):

: (2017-18) Coming from the west coast of Canada to the south is Sun, Moon and Draco. Originally from the deep southwest, Yoriv goes about being a locum tenens attending classes in Chile and Peru for a while. Thankfully, mother nature blossomed with a rainstorm in Colorado and got this Dutchman a little notice of his visit. Coming from the south-east coast of the Netherlands is Poon, Faded Squirrel and Bigfoot, whose secret identity is Mister Mustache when he's not busy trying to save the world one video game or website at a time and not drawing people stuffing dollars into his pocket. Greetings fellow furries and welcome to our new season of Furry Arts! This is one of the main reasons we started this blog years ago, to bring together the Amicable Furrries from all around the world, and have our stories told in the way we like to tell them. Whether it's shared via the comments, on the show notes, on Twitter or Facebook, or via our main blog, the Amicable Furrries podcast, and the Tumblr and Youtube where we sometimes share more personalised content. This season we have some truly inspiring stories and interesting people to share with you! Thank you to everyone who follows, likes, and watches - an extra thanks goes to those who read, and those who share too. Your support means you care about real furries and our stories, and means that we can share them in many different ways and let the world know what the Amicable Furrries really are. Narrator: Welcome to seasons with furry arts. I'm your host, friend, wizard, and submissive local furry from the north of England. Today I have three artists that need to be introduced! First up is Axel Koch, except when it's the Cthulhu Armani, and he's there! A self-taught artist, Axel is a webcomic artist, and doodler, and basically unless he's drawing something else he is probably drawing his friends. He is also a ceramic artist, arranger, co-organiser of a Meetup group in Leeds for furry fans, and member of the Guildhall Art School, which isn't the best, and maybe he'll quit at some point, he should try it more. Anyway, check out his work on Instagram @axelkoch. Second is Sir Bald

Multiplayer is really in the beginning, but I'm very excited about PvP. The Game Concept: A tower defense type game, with procedurally generated maps. You get to control six heroes, each with their own hero, an abilite and a secondary abilite. This gives you almost endless variations of gameplay. The current talent tree is in the works, but it has potential to expand based on the current play-test phase of the game. The Game Stack: The component of the game stack that is presently the most fun is the Random Map Generator. It is important that it is as true as possible to the terrain. Main Game Features: - Procedurally generated maps - Classic Tower Defense - Boost Powers - Colorful Hero and hero stacking - Over 600 different combinations of playing style - Interactive tutorial - PvE achievements - PvP achievements - Coop achievements - Community-driven coop achievements - Heroic Achievements - User Interface Customization - User Interface Customization - Custom Resource System - Custom Sound System - In-game Customization - Customizable HUD and all UI elements - Customizable User Interface - Customizable user interface - Support for other languages and internationalization Useful Searches About GameSetWatch GameSetWatch.com is the alt.video game weblog and sister site of Gamasutra.com.
